

Exercise9

CloudFormation: Infrastructure as Code (IaC)

1. Login to your IAM user
2. Search for Cloudformation
3. Create stack
 - a. specify template: Upload a template file; Choose file (choose the yaml file), next
 - b. Give stack name (DemoVPC) and name prefix (ProjectA), next, next, submit
4. Wait for 4-5 minutes for the setup to be complete (you can press refresh to check the status)
5. Upload the screenshots that shows your **IAM user name in each snapshot**:
 - a. the newly created VPC
 - b. the newly created subnets
 - c. the newly created route tables
 - d. the newly created internet gateway
6. **Cleanup**: Go back to Cloudformation, select your stack, press the delete button to delete the stack.
